A,Molecule type: protein.
A,Rolecule type: Drotein.
A,Rosidues: 2822-2859 < PE2.
A,Rosidues: 2822-2859 < PE2.
A,Cross-references: UNIPARC:UPI0000179214
A,Cross-references: UNIPARC:UPI0000179214
A,Note: this peptide, designated proline-rich polypeptide IV, can be found at several loc C,Genetics:
B, Septimetics: #status absent
A,Introns: #status absent
A,Note: single copy gene with no introns
C,Reywords: prostatic tandem repeat
C,Reywords: prostatic tandem repeat
F;1-26.Domain: signal sequence #status predicted <NA7
F;27-5761/Product: prostatic proline-rich peptides 637K proprotein #status predicted <NA7
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              hypothetical protein YXR079c - yeast (Saccharomyces cerevisiae)

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                           AAQPARRARRIKLFTHRSSV.....QKLISEEDLNMHTGHHHHHH 748
